TODAY & TOMORROW

FIRST ACTIONS TAKEN ON TASK FORCE SAFETY RECOMMENDATIONS

The Chancellor's Emergency Task Force on Personal Safety has held six public meetings on all three shifts to gain input from concerned individuals, screen suggestions, and make recommendations to the Chancellor for action. Some five hundred persons attended these sessions, and in addition letters were received from a number of individuals and groups.

The first action taken was initiated this week. The shuttle service expanded hours to 5:30 p.m.-2 a.m., and now has three pick-up points: Moffitt circle and the bus shelters in front of LPPI and Fourth and Parnassus. Night and evening workers are encouraged to participate in carpools and vanpools as safety measures. For coordination call x1151. Night and evening staff who arrive on campus after 5 p.m. are encouraged to park on H level of the garage and wait for pick-up by the shuttle if alone.

The Task Force, after meeting intensively over the past three weeks, now has divided the suggestions and concerns expressed into three parts — garage, basement, and isolated areas/miscellaneous concerns. The Task Force's first report, on the garage, was submitted to the Chancellor last week, and a letter has gone out to the entire campus community reporting on action to be taken. This process will be repeated over the next weeks, until all issues are reviewed and action taken.

The Chancellor's Emergency Task Force was selected to contain members from all sections of the campus and at all levels of responsibility. Chair is Karen Day, acting director of Hospital Material Services; cochair is Miriam Gould, head of Student Health Services and head of the Chancellor's Committee on Personal Safety. There are 30 members in all. Lt. John Anderson of the campus police, and Amy Levine, coordinator of the Rape Prevention Education program are staffing the Task Force.

John C. Greene, DMD, MPH, Deputy Surgeon General, chief dental officer of the U.S. Public Health Service, has been appointed dean of the School of Dentistry. He will begin his new post following Academic Senate review, Regents' approval and as soon as he completes responsibilities in his current position. Thomas M. Christie, associate dean, Academic Affairs and associate professor, Oral Biology, is presently serving as acting dean.

Greene has been associated with the Public Health Service in a variety of positions since 1952 and was named to his current post in March 1978. His extensive administrative background includes teaching appointments in the schools of Dentistry at UC, University of Pennsylvania and the School of Public Health, University of Michigan.

A native of Ashland, Kentucky, Greene served as an electronics technician in the U.S. Navy from 1945 to 1946. He received his DMD degree from the University of Louisville Dental School in 1952 and his MPH from UC-Berkeley, School of Public Health in 1961.

He is the recipient of a number of honors and awards, including honorary doctor of science degrees from the University of Kentucky (1972) and Boston University (1975), the Distinguished Service Medal from the Department of HEW (1975) and the Citation of Exceptional Service from the University of Pacific (1977).

NEWS BRIEFS

MUNI's crosstown (north/south) service to UCSF is scheduled to change on Wednesday, August 27, in an attempt to improve MUNI access to UCSF and make it unnecessary to drive to campus — especially for individuals living in the Richmond, Presidio, Marina, Diamond Heights, Portola, Bernal Heights, and Bayview/Hunters Point communities.

Part of a five-year plan, it calls for the extension of the No. 43-Masonic route from Masonic to Cole to Parnassus to 9th Avenue and beyond to the Forest Hill Station, down to Monterey Boulevard, City College, Balboa Park BART Station, ending at Mission and Geneva. In addition, MUNI intends to increase the frequency of the buses on this route to every 10 minutes during the midday. The route on Cole Street to 17th, Roosevelt Way, to 14th and Market will be covered by the 37-Corbett.

The No. 44-O'Shaughnessy, which runs from Diamond Heights to Forest Hill Station, will be upgraded and will replace the No. 10-Monterey, North of Forest Hill Station, going across Golden Gate Park on 10th Avenue and into the Richmond District. It will not travel over Diamond Heights, but instead take O'Shaughnessy Boulevard down to Glen Park BART station. On the Southern end it will replace the No. 51-Silver by serving the Hunters Point and Bayview Districts.

For further information call MUNI at 558-5284.

Nutrition and its relationship to cancer will be discussed at the "Second Annual Symposium on Preventive Oncology: Nutrition and Cancer" on Saturday and Sunday, September 6 and 7 at the Sheraton-Palace Hotel, S.F.

The symposium, sponsored by UCSF schools of Medicine, Dentistry, Pharmacy and Nursing; Continuing Education in Health Sciences; and the Northern California Cancer Program, will highlight the controversy and research which centers on diet, nutrition, cancer and health. For registration information call x3904.

UCSF has received a $2.8 million continuation contract from the U.S. Department of Health and Human Services to administer a cooperative statewide Area Health Education Center (AHEC) system.

Participating medical schools will include UC at San Francisco, Davis, Irvine, Los Angeles and San Diego; Stanford, USC and Loma Linda.

A $1 million federal contract for program planning to organize the statewide system was awarded last year with UCSF as the contracting school. The award was based on the success of a model AHEC Program in the central and northern regions of the state, which UCSF has operated over the past eight years in collaboration with UCLA.

It is expected that the statewide AHEC will receive renewal funding annually over the next seven years.

Project director of the statewide AHEC is Malcolm S.M. Watts, associate dean of the UCSF School of Medicine. Associate director is Clark Jones, who is based in Fresno.

The original UCSF-UCLA model AHEC was one of 11 projects created nationwide by the federal government in 1972 to provide training in health professions in areas with a scarcity of physicians and allied health professionals.

A $2.5 million grant has been awarded to UCSF by the National Cancer Institute to conduct a five-year study of the epidemiology and natural history of breast cancer. The study involves 4,000 women and will be jointly conducted at UCSF and Children's Hospital.

It is a continuation of pioneering work — begun eight years ago by principal investigator Nicholas L. Petrakis, professor, Preventive Medicine and chairman, Epidemiology and International Health — which has shown that the adult human breast secretes and concentrates potentially toxic and mutagenic substances from the blood. They can lead to damage of the breast gland and ultimately to breast disease.

The new Division of Family and Community Medicine has been established as an independent academic unit in the School of Medicine, with responsibility for core and elective medical student teaching, residency training, research and patient care.

The division chairman will report directly to the dean of the School of Medicine.

Establishing the new division is part of a reorganization that also involved creating the Division of General Internal Medicine, headed by Steven A. Schroeder, associate professor of Medicine. It will have responsibility for general medical care at UCSF.

Acting chairman is Joseph Barbaccia, professor of Family and Community Medicine and director of the Health Services Research Unit. Acting vice chairmen are Donald L. Fink, professor of Pediatrics, and medical director, Outpatient and Community Services, SFGH; and Jonathan E. Rodnick, assistant clinical professor, Family and Community Medicine.

The major educational task of the division will be administration of five family practice residency programs in clinical sites affiliated with UCSF: Community Hospital of Sonoma, Santa Rosa; Valley Medical Center, Fresno; Natividad Medical Center, Salinas; Silas B. Hays Army Hospital, Fort Ord; and SFGH.

The division is based temporarily in 405 A, x1482, and the Health Services Research Unit at 1487 Fourth Avenue, x4061.

The UCSF Child Care/Study Center will be open Saturdays and Sundays, Aug. 2 to Aug. 24, 10 a.m. to 4 p.m. to provide care for children whose brothers and sisters are patients in Moffitt's pediatric unit.

The drop-in pilot program, initiated by the Department of Pediatrics and the Family Health Care Nursing Department, School of Nursing, is supported by Title 1-A funds from the California Postsecondary Education Commission. Well children of any age will be accepted, and will be given snacks and bag lunches. Marlene Cohen is the project coordinator. The program will be staffed by a certified child care teacher, assisted by older adults who are graduates of the Intergenerational Child Caregiving Project.

A fee of $1 per hour per family (not per child) will be charged.

The Reprographics Department has a change in hours. Both the administrative office at AC-12 and the production shop at 2550 Judah Street will now be open from 8 a.m. to 4:30 p.m. instead of 7 a.m. to 5:30 p.m. The Quick Copy Center will remain on its regular schedule of 8 a.m. to 4:30 p.m.
